MEMORANDUM FOR: Director of Logistics

SUBJECT : Initiation of Task Order
25X1A5a1 [REDACTED]

1. This Office has a requirement for a flux-sensitive magnetic tape reproducer for the analysis of wideband signals. A flux-sensitive reproducer provides response at lower frequencies than conventional machines, thereby allowing use of a slower tape speed and transfer of recorded data to a paper chart recorder.

25X1A5a1

2. Such a system is presently under development by [REDACTED] for the Agency, and is showing sufficient success to warrant duplication of their system for use on another tape transport. The contractor has submitted the attached cost-plus-fixed-fee quotation for the required effort.

25X1A5a1

3. It is therefore requested that a new task order be initiated with [REDACTED] for fabrication of a flux-sensitive magnetic tape reproducer identical in function to the unit being developed under Contract 649, Task Order 14. Government furnished equipment will consist of a [REDACTED] transport.

25X1A5a1

25X1A9a

25X1A5a1

4. Cognizant project officer is [REDACTED] extension 4518.

25X1A9a

GEORGE C. MILLER

Assistant Director for ELINT, DD/S&T

MEMORANDUM FOR: Director of Logistics

SUBJECT : Assignment of New Task Order to Contract 630
with [REDACTED] 25X1A5a1

1. The Office of ELINT, under Project 7025, has been engaged in a contract with [REDACTED] under Contract 630, Task Order 11. This task called for the development of a miniature portable transistorized [REDACTED]. A satisfactory engineering model has been developed and Task Order 11 will expire on 15 March 1964. Therefore, this Office requests the assignment of a new task order to permit construction of five service test models of the [REDACTED]
